

Since 1923  
Farmatan

## Rich history since 1923

Farmatan Tannic Acid is nature's answer to scours. Produced naturally from trees it has been used for generations in Europe to naturally protect animals from pathogens that can attack the immune system.

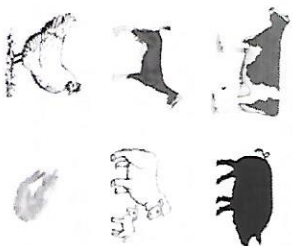

Europe discontinued use of antibiotics in feed in 2006 and Chestnut tannin has been used widely to support livestock immunity.

Trees cover approximately 65% of Slovenia where Tanin Sevnica have produced tannin from Sweet Chestnut tress since 1923 and today supply 49 countries.

Since 1923
