

Technical Brief

farmatan™ is available as an AAFCO approved and Organic certified hydrolysable tannin from selected Sweet Chestnut wood extract (*Castanea Sativa*) that supports the health of animals.

farmatan™ provides a diversity of bioactive polyphenols providing optimum use and absorption of nutrients and maintenance of a strong immune system.

farmatan™ can be used in all livestock species and is safe for the environment.

farmatan™ Provides Value Added Benefits

- **Protection of young calves** through optimum IgG levels in colostrum
- **Maintenance of a low pathogen load** by aiding in the maintenance of healthy intestinal tissue and action of selective astringent properties
- **Broad spectrum protection:**
 - **Protozoa** - Cryptosporidium and Coccidiosis
 - **Bacteria** - E.coli, Salmonella, and Clostridia
 - **Virus** - Rotavirus and Coronavirus
- **Maintains intestinal integrity** – aids in prevention of leaky gut in the small intestine
- **Maintains optimum liver health and function** – high antioxidant qualities and helps regulate rumen pH to prevent acidosis and development of liver abscesses
- **Promotes good rumen function** – Optimum feed efficiency and nutrient intake levels promote growth, production, and animal health
- **No withdrawal issues** – usage at any stage of production
- **Heat stable** to over 300F – feed processing is no issue
